

200 SERIES

Gliding Windows

Beauty

Natural wood complements your home's interior with solid craftsmanship.

Weathertight Performance

Durable weatherstripping helps create a tight seal against air and water, and Low-E insulating glass helps lower heating and cooling costs.

Durability

Andersen® windows combine the strength and insulation of natural wood on the inside with seamless, vacuum-formed vinyl cladding on the outside.

Smooth Operation

The sash glides open and closed with ease, thanks to a raised gliding track system that's less sensitive to dirt build-up.

Owner-2-Owner® Limited Warranty

Glass is covered for 20 years and non-glass parts are covered for 10. Coverage is not pro-rated and can add real value when the home is sold.

features & options

With Low-E glass, these products are designed to use less energy, help you save money on utility bills and help protect the environment.

Contemporary gliding design features a natural wood interior that can be painted or stained.

Optional Andersen® Finelight™ grilles are factory-installed between the panes of glass, out of the way for easy cleaning.

Optional TruScene® insect screens feature micro-fine mesh that lets more light and fresh air into your home, yet keeps even the smallest insects out.
