

400 SERIES

Frenchwood® Gliding Patio Doors

Beauty

Natural wood complements your home's interior with classic style and finely crafted details.

Durability

Andersen® patio doors combine the strength and insulation of natural wood with low-maintenance exterior cladding.

Weathertight Performance

High-Performance™ Low-E4® glass helps insulate against heat and cold, which can help cut energy bills. It also filters UV rays that can fade fabric and damage furniture. In addition, full-length weatherstripping helps create a tight seal between the interlocking door panels.

Strength and Security

The lock reaches out and pulls the door panel snugly into the frame for weathertightness and enhanced security.

Easy Cleaning

 High-Performance Low-E4 glass has an exterior coating that stays cleaner, dries faster for easy cleaning and has up to 99% less water spots (exterior pane only when activated by sunlight).

Owner-2-Owner® Limited Warranty

Glass is covered for 20 years and non-glass parts are covered for 10. Coverage is not pro-rated and can add real value when the home is sold.

features & options

With High-Performance™ Low-E4® glass, these products are designed to use less energy, help you save money on utility bills and help protect the environment.

Watertight sill has an extruded aluminum track and a thermal barrier for durability, low-maintenance and excellent insulating characteristics.

Panels are constructed with mortise-and-tenon joints for maximum strength and stability.

Expanded hardware offering includes Metro™, Estate™ and Andiron® collections for just the right look inside and out.
