

400 SERIES

Tilt-Wash Double-Hung Windows

Beauty

Natural wood complements your home's interior with classic style and finely crafted details.

Weathertight Performance

High-Performance™ Low-E4® glass helps insulate against heat and cold, which can help cut energy bills. It also filters UV rays that can fade fabric and damage furniture. In addition, durable weatherstripping helps create a tight seal against air and water.

Durability

Andersen® windows combine the strength and insulation of natural wood on the inside with seamless, low-maintenance cladding on the outside.

Smooth, Quiet Operation

Open and close the sash with ease, thanks to patented weatherstripping that reduces friction and a specially engineered counter-balance system.

Easy Cleaning

High-Performance Low-E4 glass has an exterior coating that stays cleaner, dries faster for easy cleaning and has up to 99% less water spots (exterior pane only when activated by sunlight). And the tilt-wash design makes it easy to clean the exterior glass from inside your home.

Owner-2-Owner® Limited Warranty

Glass is covered for 20 years and non-glass parts are covered for 10. Coverage is not pro-rated and can add real value when the home is sold.

features & options

With High-Performance™ Low-E4® glass, these products are designed to use less energy, help you save money on utility bills and help protect the environment.

Choose from a variety of grille options: standard, specified equal light and custom patterns are available.

Optional TruScene® insect screens feature micro-fine mesh that lets more light and fresh air into your home, yet keeps even the smallest insects out.

Standard lock and keeper is white on units with pre-finished white interior and stone on units with clear pine interior.
